

List of Figures

Figure 3.1: Neshanic River Watershed, New Jersey.....	19
Figure 4.1: Location and transportation network in the Neshanic River Watershed.....	23
Figure 4.2: Topography in the Neshanic River Watershed.....	24
Figure 4.3: Spatial distribution of bedrock in the Neshanic River Watershed	27
Figure 4.4: Distribution of soil types in the Neshanic River Watershed	28
Figure 4.5: Spatial distribution of groundwater recharge in the Neshanic River Watershed	35
Figure 4.6: Spatial distribution of SSAs in the Neshanic River Watershed	37
Figure 4.7: Average monthly precipitation in watershed and streamflow at watershed outlet, 1997-2008	38
Figure 4.8: Spatial distribution of hydric soils, linear wetlands and wetlands in the Neshanic River Watershed.....	40
Figure 4.9: Spatial distribution of HSAs in the Neshanic River Watershed.....	42
Figure 4.10: Comparison between (a) FEMA flood hazard map and (b) NJDEP flood prone area map in the Neshanic River Watershed.....	43
Figure 4.11: Spatial distribution of the riparian areas in the Neshanic River Watershed.....	44
Figure 4.12: Spatial distribution of land uses in the Neshanic River Watershed, 1986, 1995, 2002 and 2007	46
Figure 4.13: Spatial distribution of the preserved farmlands in the Neshanic River Watershed..	48
Figure 4.14: Spatial distribution of the preserved open space in the Neshanic River Watershed	49
Figure 5.1: Distribution of streams and roads in the Neshanic River Watershed.....	55
Figure 5.2: Hydrograph at the USGS Reaville station in the Neshanic River Watershed.....	55
Figure 5.3: Flooded Hampton Corners Road after a spring storm.....	56
Figure 5.4: Land uses in HSAs in the Neshanic River Watershed, 2007	56
Figure 5.5: Land uses in riparian areas of the Neshanic River Watershed, 1986, 1995, 2002 and 2007.....	57
Figure 5.6: Location of the seven monitoring stations in the Neshanic River Watershed.....	59
Figure 5.7: USGS Reaville gage station (N1).....	60
Figure 5.8: Water quality monitoring stations in the Neshanic River Watershed	72
Figure 5.9: Location of soil erodibility classes in the Neshanic River Watershed.....	77
Figure 5.10: Channel stages assessed at fifteen locations in the Neshanic River Watershed.....	79
Figure 5.11: Sources and yields of sediment in the Neshanic River Watershed	80
Figure 5.12: SVAP location and assessment results in the Neshanic River Watershed.....	82
Figure 6.1: Load duration curves for TSS	88

Figure 6.2: Load duration curves for TN	89
Figure 6.3: Load duration curves for TP.....	90
Figure 6.4: Load duration curves for fecal coliform.....	91
Figure 6.5: Load duration curves for <i>E. coli</i>	92
Figure 7.1: Location of potential neighborhoods for rain garden installation in the Neshanic River Watershed.....	111
Figure 7.2: Location of swales and ditches in the Neshanic River Watershed.....	114
Figure 7.3: Detention basin in TN3a.....	115
Figure 7.4: Location of detention basins with priority for retrofitting in Neshanic River Watershed	118
Figure 7.5: Typical profile of a vegetative buffer in a non-agricultural setting (Semple et al., 2004)	119
Figure 7.6: Potential sites for vegetative buffers on developed lands in the Neshanic River Watershed	121
Figure 7.7: Potential sites for livestock exclusion fencing in the Neshanic River Watershed ...	123
Figure 7.8: Location of the agricultural lands for conservation buffers under two targeting strategies	125
Figure 7.9: Location of potential fields for contour farming in Neshanic River Watershed	132
