

List of Tables

Table 2.1: Recommended BMP projects for the Neshanic River Watershed.....	11
Table 2.2: Priority ranks for all BMP projects in the Neshanic River Watershed.....	12
Table 2.3: Implementation targets for the recommended BMP projects in the Neshanic River Watershed	13
Table 2.4: BMP implementation schedule in the Neshanic River Watershed.....	14
Table 2.5: Potential sources of funding for implementation of BMP projects	17
Table 4.1: Area, population and population density of municipalities in the Neshanic River Watershed	25
Table 4.2: Changes in population and number of dwelling units for municipalities in the Neshanic River Watershed, 2000-2010	26
Table 4.3: Area distribution and farmland designation of soils in the Neshanic River Watershed	29
Table 4.4: List of endangered species and their habitat priority in the Neshanic River Watershed	33
Table 4.5: Area distribution of groundwater recharge in the Neshanic River Watershed.....	34
Table 4.6: Hydric soil type and their acreages in the Neshanic River Watershed.....	39
Table 4.7: The types and areas of wetlands in the Neshanic River Watershed, 2007	41
Table 4.8: Land uses in the Neshanic River Watershed, 1986, 1995, 2002 and 2007.....	47
Table 4.9: Types and numbers of inventoried stormwater infrastructure.....	52
Table 4.10: Status of stormwater discharge structures in the Neshanic River Watershed	53
Table 5.1: Basic statistics of water quality monitoring results in the Neshanic River Watershed	62
Table 5.2: AMNET monitoring results in the Neshanic River Watershed, 1994, 1999, 2004 and 2007.....	65
Table 5.3: Agricultural activities and potential related pollutants (Krivak, 1978)	66
Table 5.4: Areas and percentages of urban land uses in the Neshanic River Watershed, 2002 ...	70
Table 5.5: Ranking of the subwatersheds by normalized annual pollutant loads.....	73
Table 5.6: Average annual loads of TN and TP in the Neshanic River Watershed.....	74
Table 5.7: Average annual loads of fecal coliform and <i>E. coli</i> in the Neshanic River Watershed	75
Table 5.8: Average annual loads for nutrients and pathogens by subbasin and ranks of subbasins based on average annual loads.....	75
Table 5.9: Rosgen analysis for Neshanic River subwatersheds.....	78
Table 5.10: Average annual water yields of subbasins, 1997-2008	83
Table 5.11: Total and annual average water yields by land use, 1997-2008	84

Table 6.1: Frequency of exceedance and load reduction target for the pollutants of concern in the Neshanic River Watershed.....	93
Table 6.2: Definition of BMPs.....	94
Table 6.3: Pollutant load reduction and the frequency of daily load exceedance for five pollutants with alternative BMPs in the Neshanic River Watershed.....	96
Table 7.1: NJWSA open space criteria for acquisition and easements (NJWSA, 2002).....	109
Table 7.2: Annual pollutant load reduction and volume of water intercepted for different homeowner adoption rates for residential rain gardens in the Neshanic River Watershed	112
Table 7.3: Roadside ditch prioritization criteria and criteria scores	114
Table 7.4: Criteria for prioritizing detention basins and prioritization criteria scores.....	118
Table 7.5: Priority rankings, length and installation cost of potential livestock exclusion fencing sites in Neshanic River Watershed	122
Table 7.6: Cost estimates for two conservation buffer scenarios in Neshanic River Watershed	125
Table 7.7: Acreage of buffers and their priority ranking by subbasins in Neshanic River Watershed	126
Table 7.8: Pasture acreage and priority for grazing management by subbasins in Neshanic River Watershed	129
Table 7.9: Acreage of agricultural lands and TP priority by subbasins in the Neshanic River Watershed	130
Table 7.10: Cropland acreage for contour farming and TP priority ranking by subbasin	131
Table 7.11: Water quality effects, costs and cost-effectiveness of agricultural BMPs in the Neshanic River Watershed.....	188
Table 7.12: Water quality effects, costs and cost-effectiveness of stormwater BMPs in Neshanic River Watershed.....	190
Table 7.13: Costs of three major BMPs for reducing pathogenic loads in Neshanic River Watershed	191
Table 7.14: Priority ranks for all BMP projects in Neshanic River Watershed.....	192
Table 8.1: Applicable units and costs of recommended BMP projects in Neshanic River Watershed	194
Table 8.2: Implementation targets and costs for recommended BMP projects in Neshanic River Watershed	196
Table 9.1: Potential barriers to BMP implementation	207
Table 10.1: Implementation goals, expected pollutant load reductions and implementation costs of BMP projects for the first two years of plan implementation	214
Table 10.2: Implementation goals, expected pollutant load reductions and implementation costs of BMP projects in first five years of plan implementation.....	215

Table 10.3: Implementation goals, expected pollutant load reductions and implementation costs of BMP projects in 10 years..... 216

Table 12.1: Priority ranks for all BMP projects in the Neshanic River Watershed..... 226

Table 12.2: Implementation targets for the recommended BMPs in the Neshanic River Watershed 227

Table 12.3: Potential sources of funding for implementation of BMPs 228

Table 12.4: BMP implementation schedule in the Neshanic River Watershed..... 231
